About MIS Group

Welcome to MIS Group, a unique business group established in 2003. MIS Group is a leading international brokerage and consultancy focusing in ship sales, marine services and naval architecture. Consisting of maritime professionals, we draw upon a wide range of experience and expertise to provide high-quality products and services. Our major goal is to help our customers make reliable, cost-effective and environmentally operations of their business.

Our Services

From Initial idea to its materialization we support our costumers at every stage of the project.

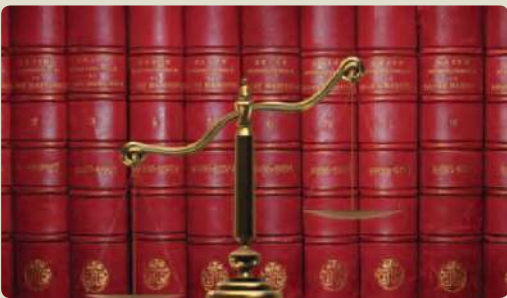

Project Management

Our long-term involvement in numerous challenging projects in West Africa, Europe and Asia have made us a highly trusted partner. We aim to ensure that our customers technical, time and cost specification are met during the whole project.

Business Plan & Feasibility Studies

MIS Group in cooperation with the world's biggest investment and asset management firms, provides assistance to customers to get the best of their idea. Either is an idea of a purchase or a brand new concept design, our consultants will undertake a thorough investigation of its feasibility, assess the economic practicality and suggest creative investment solutions.

Law Consultancy

With reliable and trustworthy correspondents worldwide we effectively meet the needs of a demanding, diverse, and international clientele, ranging from P&I clubs, ship owners to govermental bodies and construction companies. We are provide a fast and wise approach to your needs.

Enviromental Support

Enviromental Impacts of a project is a major component that must not be omitted. With experienced employees with the current legislation we measure and model all the enviromental aspects of a project and finally help our customers comply with the rules and meet all the expectations.

Design

Our mission to help our clients provide safe and efficient transportation is obvious at the early stage of the design process. Our designers and naval architects seek the best combination between innovation, quality, marine safety and human factors engineering in order to meet the needs of each client.

Ship Sales

We have successfully concluded the sales of numerous vessels which are now trading in areas such as West & East Africa, the Caribbean, Venezuela, Chili as well as Europe, to mention but a few areas.

Yachting Sales

Motor Yachts

Our crewed luxury motor yachts sail you and your guests to the far reaches of Greece's Mainland and islands.

Motor Sailers

Our crewed motor sailers available for charters in Greece are all of exceptional quality in of their interior furnishings and facilities.

Sailing Yachts

A wonderful advantage of crewed sailing yacht charter in Greece is the total peace and quiet when the engine is turned off and you sail off into the sunset for unforgettable charter yacht sailing holidays.

Catamarans

Superbly equipped, as we strive to constantly improve them down to the smallest detail.

Marine Services

- **Sea Transportation Transhipment**

Marine Services Company has a long history of operating and use of floating cranes, barges and transportation means for cargo shifts. Thanks to an efficient design can tranship a highly productive rate of cargo per day, utilizing a large number of lifting parts (grab, clam-shells, etc.).

- **Underwater Works**

We handle underwater surveys (inspections, videotaping, photographing, oceanic hydrography), underwater welding and cutting, laying and repairing of pipes and cables and construction.

- **Towage Salvage**

Towage services are provided with a modern tug fleet ranging up to 100 tons bollard pull, fitted with Dynamic Position System , as well.

- **Depollution Services**

We are possessing contingency plans, experienced employees, suitable and adequate equipment (booms, oil skimmers, chemical solvents, modern absorbent materials, etc.), so as to be able to cope with sea pollution incidents.

Our Company has also a proud background and an excessive experience in salvage and wreck removal operations. In this respect, our services can be delivered round the clock and on short notice, in any case of a marine incident occurred, by giving our best efforts to control, minimize and finally suppress sea and environmental pollution.

- **Yacht Repairs Maintenance**

Our services are very broad ranging from basic maintenance to complete refit of yachts, using up to date technologies and processes, complete refurbishment, interior design – decoration, antifouling, engineering, several surface preparation techniques, full paint jobs, teak decking etc.

- **Dredging**

This includes self-propelled split hopper barges and back-hoe spud leg pontoons. Our split hopper barges range in capacity from 150m³ to 415m³ and can be used for beach replenishment works. Custom made hardwood protective mats are available for handling small rock and stone material, or for the re-handling of contaminated sediments.

- **Port Management**

MIS Group operates facilities with the aim of achieving yield that is at least double the industry average standard. We operate and maintain ports. We also provide marine services as well as maintenance, service improvements, and start-up support activities.

- **Specialized In Sea Passenger Transportation**

MIS Group has many years of experience in the sea transport business. The company takes pride in a prompt, efficient and reliable service. The services cover a wide range of ports all over the world. Traffic is operated with modern ro-ro vessels catering for lorries, trailers, other mobile cargo, containers and break bulk.

- **Flag of Convenience**

With vast experience in the field and thorough knowledge of regulations and industry standards, MIS Group has been for many years a reliable source of ship registration and allied services for a large number of clients in all continents.

- **Ship Building Finance**

Crew Management

MIS Group Partners belong to the world's leading independent crewing, crew management & training service providers. Since 1977, we offer unparalleled crewing solutions in partnership with some of the most sophisticated, respectable shipping houses.

We are proud of our solid family ethos which is reflected in our customer-centric logic and acute personalized servicing. This ethos is complemented with the most up-to-date technology-driven practices which characterize every single dimension of our professional activity.

We would welcome the opportunity to collaborate with you and explain how we can co-create value that will maximize benefits for your corporation.

We are Principal-driven & Seafarer-focused

We offer high quality services devoting our full attention to the human factor and depending on the Principals' differing needs, we offer the following options:

Simple Crew Manning Scheme

Crew Management at cost with supporting vouchers

Crew Management all inclusive package

Custom-made Crewing

Office-in-Office

Training

We also provide a series of innovative services that showcase our ethical and transparent way of doing business in the maritime industry, allowing Principals to monitor every single dimension of our services 24/7.

Oil & Gas Trading

MIS Oil Trading was founded with a singular aim – to be the market leader in petroleum product trading. With our expertise and experience in the industry and our strong partnerships, we deliver high quality products that meet the needs of our customers.

Our integral knowledge of the industry, through our team of expert professionals, is our differentiating strength. We believe that petroleum trading is built on the pillars of trust, market knowledge and integrity, and we commit ourselves to adhering to these core values in everything we do.

In addition to our principal footprint in the UAE, where we serve our customers through a fleet of road tankers, we are expanding our presence to serve global markets through our own dedicated fleet of vessels and our industry partnerships. We see enormous value in petroleum trading from Dubai, a hub for global trade, and we will continue to innovate and bring international best practices to position ourselves as a leading and trusted name in petroleum products in the country.

What we offer?

MIS Oil Trading offers a wide spectrum of petroleum products that meet the diverse needs of clients in the region, India and Africa markets. Across every product line, MIS Oil Trading focuses on ensuring the highest standards of quality and in delivering products as per client specification on-time.

Gasoil: We deliver various grade of Gasoil with Sulphur ranging from 2500 ppm to 10 ppm

Gasoline: We deliver Gasoline with Octane 90, Gasoline octane 95

Naphtha: We offer a range of Light and heavy naphtha

Fuel oil: We deliver various fuel grade as per bunker market requirements and also fuel oil for power generation.

Cutter stocks: We provide cutter stock required for blending

Base Oil: We deliver various grades of base oil

Bitumen: We provide various grades of bitumen in the region also to African countries, India and Bangladesh

Petrochemical Products: We trade in PVC, Polypropylene, Polystyrene, PET, Urea, Sulphur, Caustic soda, Soda ash, Methanol, MEG, DEG

Spare Parts

MIS Group is known for its innovative and resourceful ways of dealing with the delivering of equipment and spare parts. We understand that time and money are limiting factors. We are flexible in our operations and we supply the requested equipment and spare parts from our stocking points, but are also able to find those hard-to-locate and critical parts you are looking for.

From valves to actuators, from limit switches to sensors – MIS Group is your reliable partner for spare parts and components. For detailed information about products and availability please contact us

Products

Here you find an overview of our main marine spare parts and the industrial equipment our company supplies.

Technical Supply & Services For Marine, Offshore And Industry

- Pumps Centrifugal
- Pumps Positive Displacement
- Pumps Spare Parts
- Mechanical Seals
- Couplings & Inserts
- E-motors
- Bearings
- Drive Belts
- Compressors Air
- Compressors Refrigeration
- Valves
- Cargo Hoses
- Hydraulics
- Diesel Engine Spare Parts

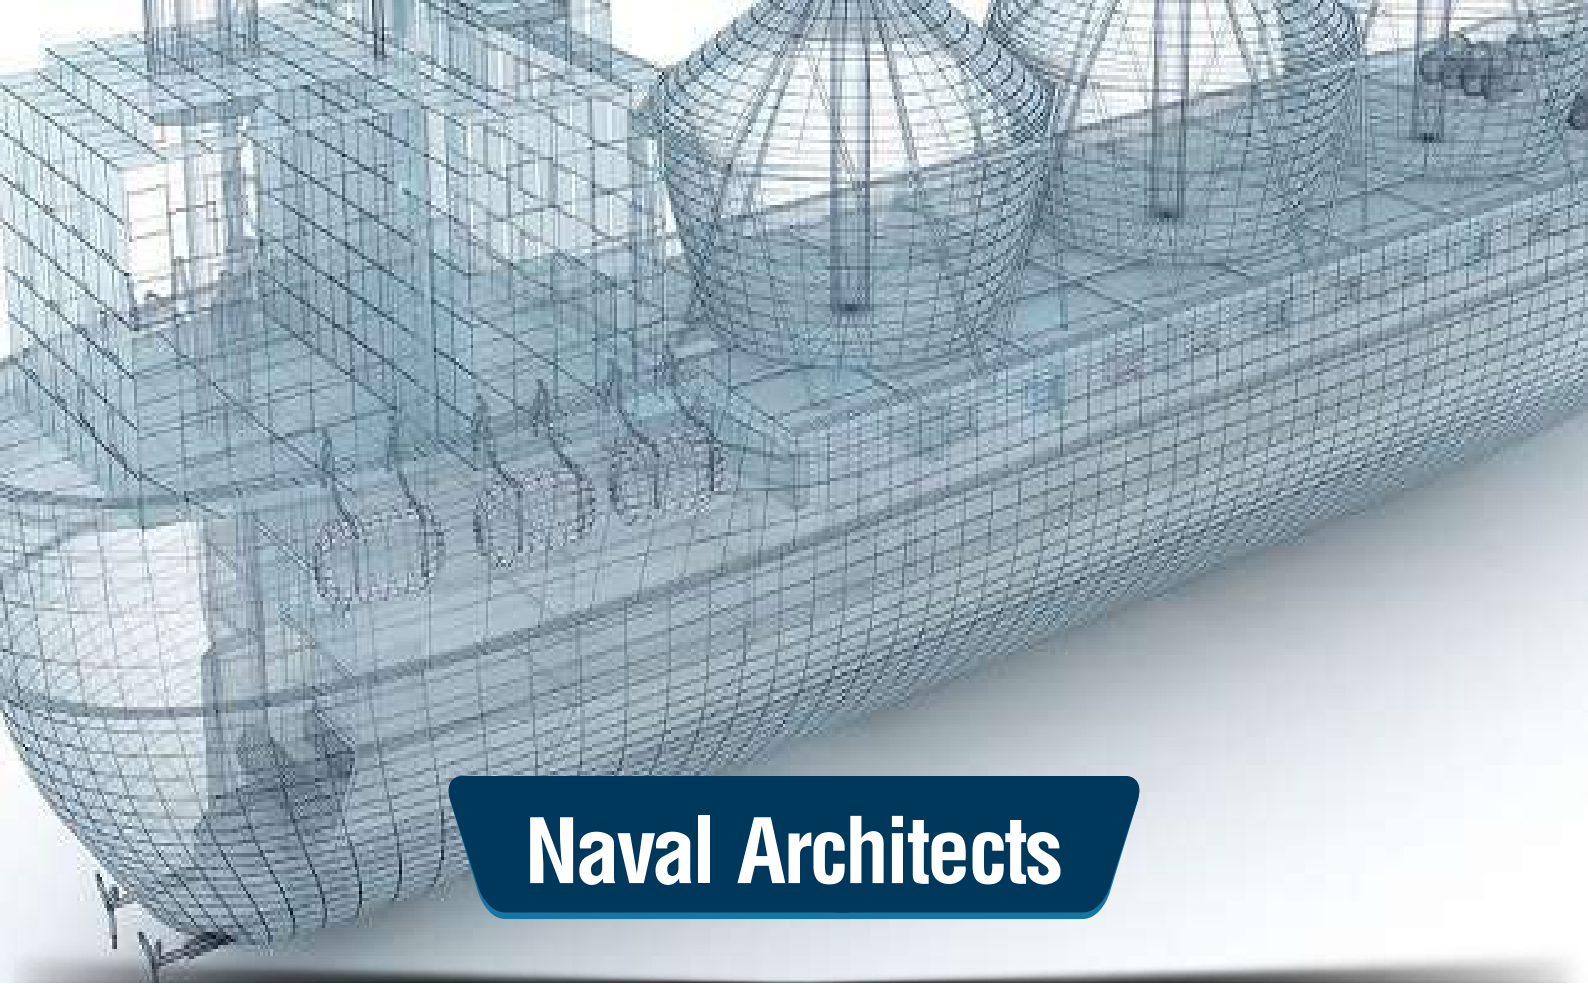

Maritime Law Firm

We are a niche Law Practice, that provides high quality, tailor made Advocacy and Consultancy services, with particular focus in shipping and commercial law matters. We operate as an unincorporated association of professionals. Our members are solicitors, lawyers, ex members of the senior Judiciary and ex mariners. We dare to name ourselves “the fastest growing firm” providing a real “one stop” service to the client.

We provide a first class and cost effective service to our clients within the Greek jurisdiction and beyond. With reliable and trustworthy correspondents worldwide, we effectively meet the needs of a demanding, diverse and international clientele, ranging from P&I Clubs, H&M underwrites, ship owners and salvors, private investors and funds, governmental bodies & organisations, banks and construction companies. You will find nowhere else a faster and wiser approach to your needs and our existing clients are ready to confirm this.

For more information about our activities and services visit our website mis-mlc.com

Naval Architects

Our mission to help our clients provide safe and efficient transportation is obvious at the early stage of the design process. Our designers and naval architects seek the best combination between innovation, quality, marine safety and human factors engineering in order to meet the needs of each client

Together with our partners we have developed new ship designs and have now a sustainable collection of designs. We guarantee up-to-date tools and experience for most tasks in offshore engineering, and for the building and operation of reliable and economically attractive ships and floaters.

We provide all design, engineering and documentation required to build ships, floating structures and platforms according to customer needs.

Designs

Our extensive experience designing highly effective Ferries covers all types of fuel, vessel sizes and concepts. We focus on continuously improving our designs and way of working in order to be at the forefront of the technological development.

- Ferries
- Cruise & Ropax Vessels
- High-speed Vessels
- Merchant Vessels
- Drillships
- Floating Offshore Units
- Offshore Service Vessels

What We Do

We provide all design, engineering and documentation required to build ships, floating structures and platforms according to customer needs

Increased customer value

Meeting customer needs and exceeding their expectations forms the foundation of our existence. To achieve this we focus on designing ships, platforms and floating structures with the highest performance possible, introducing the latest technology and making use of state-of-the-art tools through all stages of the design process.

Optimized vessel performance

Our focus is to optimized vessel performance so that the ship owners truly benefit from our designs. This includes among others designing:

Drillships and offshore vessels with superior station-keeping and seakeeping capabilities

Ferries and high-speed vessels with minimum fuel consumption

Cruise vessels with maximized passenger comfort and safety

Latest technology

MIS Group assist ship owners to introduce cutting-edge, environmentally friendly solutions for their ships. We were pioneers in introducing LNG propulsion, and have several award-winning vessels on our reference list. We have also experience with batteries, hydrogen as well as different type of green technology hybrid solutions.

Design requirements

MIS Group assist clients with studies and evaluations in order to define design requirements for a given ship in a given trade. This includes logistic studies for supply of LNG fuel, route studies to define fuel consumption and emissions, as well as cargo handling studies. These activities which especially for innovative designs and new technologies are required as basis for the ship design optimization.

State-of-the-art tools

We have the tools and experience to cover all major disciplines within ship design, naval architecture and marine engineering in-house. We are also utilizing document handling and project management tools and solutions of the highest standards. This is increasing the accuracy and flexibility of the design process and securing quality products to our customers.

All stages of the design process

MIS Group cover all stages of the design process, from a first sketch on the back-of-an-envelope to workshop drawings and sea-trial verification. We have the project management experience and capability to handle large, multi-disciplinary projects covering initial-, basic- and detail design

WHAT DO YOU NEED TO DO NEXT?

Should you have any staffing requirements or wish to discuss anything in particular about our services, please contact our National Establishments Team by telephone or email.
